Australia Center for Educational Research

## ONE-DAY SEMINAR

# Having, Using and Integrating Technology in Teaching, Learning and Assessment

TECHNOLOGY HAS MADE SIGNIFICANT  
INROADS INTO EDUCATION, AS IT HAS IN  
ALL AREAS OF MODERN LIFE.

**Catherine McClellan**  
is the Division Director,  
Assessment and  
Psychometric Research,  
at the Australian Council  
for Educational Research.  
She has over 20 years of  
experience in education  
and assessment. She is  
the owner of Clowder

Consulting, providing services in psychometrics, teacher observation, and observer training. She has worked with clients including the AFT, NEA Foundation, NNSTOY, RIFTHP, NYSUT, Tripod Education, Chicago and Boston Public Schools, and the Tennessee Consortium on Research, Evaluation, and Development. She received her Ph.D. in Research Evaluation and Methodology from the University of Florida.

**Moderator:**

**Urip Purwono, Ph. D.**

Kepala Pusat Studi Psikometri, Asesmen  
dan Evaluasi, Fakultas Psikologi  
Universitas Padjajaran  
(Adviser, ACER – Indonesia)

Computers, laptops, tablets, mobile phones, web sites, social media, smartboards, video games, virtual reality, artificial intelligence: the list is extensive, and all have a place. Many education systems and authorities expend a great deal of money and resources acquiring and upgrading technology tools for use in their classrooms. However, possessing technology tools is a different matter from effectively using them. Doing things in the traditional way using an electronic platform as a presentation medium may be a step forward. Integration is an even higher standard

*When technological tools are not just a new way to do an old thing, but become an essential and natural part of the processes, we have achieved an advance in education that will stand us in good stead as we move forward into the future—where technology and tools as yet unimagined await us.*
